About the job

Job Summary

DESCRIPTION

The Amazon Device Services organization is hiring a Software Development Engineer to help us build cross-platform software to enable the seamless launch, provisioning and management of devices.

Are you looking to join a start-up team and interested in building innovative, mission critical, high-volume applications? Then this is the role for you!

Key job responsibilities

In this role, you will have a tremendous opportunity to make a large impact on the design, architecture, and implementation of transformative technologies for one or more of supply chain applications.

We are looking for a talented Software Development Engineer to help build our Supply Chain and Operations platform of the future. We are starting an exciting journey of building full stack platform for our internal customers, including Forward and Reverse Logistics, Manufacturing Operations, Finance, and internal technical teams. We are looking for someone who is passionate about delivering the best possible customer

experience and allowing us to meet our customer obsession of making our current and upcoming line of devices available in-stock to delight our customers.

About The Team

The team is responsible for building solutions that enable Device Operations and Supply Chain end-to-end: from product design and component sourcing, through production and shipment, to returns, screening and repair. We innovate to deliver timely and scalable technological solutions and automate operational tasks to allow the business to focus on high value-add activities and grow.

Basic Qualifications

- 1+ years of experience contributing to the system design or architecture (architecture, design patterns, reliability and scaling) of new and current systems.
- 2+ years of non-internship professional software development experience
- Programming experience with at least one software programming language.

Preferred Qualifications

5+ years industry experience as a Software Engineer or Software Developer

Experience developing complex software systems that have successfully been delivered to customers

Experience in communicating with users, other technical teams and senior management to collect requirements, describe software product features, technical designs and product strategy

Knowledge of professional software engineering practices & best practices for full software development life cycle, including coding standards, code reviews, source control management, continuous deployments, testing and operations

Demonstrated ability to mentor junior software engineers in all aspects of their engineering skill-sets

The pay range for this position in Colorado is \$143k - \$194k/yr however, base pay offered may vary depending on job-related knowledge, skills, and experience. A sign-on bonus and restricted stock units may be provided as part of the compensation package, in addition to a full range of medical, financial, and/or other benefits, dependent on the position offered. This information is provided per the Colorado Equal Pay Act. Base pay information is based on market location. Applicants should apply via Amazon's internal or external careers site.

Amazon is committed to a diverse and inclusive workplace. Amazon is an equal opportunity employer and does not discriminate on the basis of race, national origin, gender, gender identity, sexual orientation, protected veteran status, disability, age, or other legally protected status.
